Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2153

1. Claims 1-28 are presented for examination.
2. Claims 1-28 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 (line 3), it is unclear where a first set of access addresses is coming from. At line 7, it is unclear where the request is received and from where the request is coming from.

As to claims 8, 15 and 23, they contain similar problem as claim 1.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-28 are rejected under 35 U.S.C. § 102(a) as being anticipate by the Cisco publication ["Data Sheet Cisco Service Selection Gateway", hereinafter "Cisco publication"].

5. Cisco Publication anticipated the invention substantially as claimed. Taking claim 1 as an exemplary claim, the reference disclosed the Cisco Service Selection Gateway (SSG of Fig. 1) that allows subscribers to access a service (e.g. videoconferencing, streaming video, shopping, etc; a service provided by service providers, a first page), said method being performed in a service selection gateway (SSG, see page 1), said method comprising:

- a) receiving a first set of access addresses (URL or list services, page 2) or associated with said service;

- b) forwarding a first plurality of packets (forwarding, see page 2), each of said first plurality of packet is destined to one of said first set of access addresses such that said subscriber can access said service;
- c) receiving a request to change (switching or routing, see page 2) said first set of access addresses to a new set of access addresses; and
- d) forwarding (forwarding via normal routing or next-hop table, page 2) a second plurality of packets, each of said second plurality of packets being destined to one of said new set of access addresses.

6. As to claim 2, Cisco Publication disclosed the step of maintaining a service information which determines whether each packet is forwarded or not (e.g., see Transmission Control Protocol Redirect and Domain Name System Fault Tolerance sections on page 2).

7. As to claim 3, Cisco Publication disclosed the request to change (switch, web selection or select-on-demand service) comprises a request to add a new address to said first set of addresses (see page 1, first paragraph).

8. As to claim 4, Cisco Publication disclosed wherein a subscriber system used by the subscriber communicates directly with a user system having the new address when the service information comprises said new set of access addresses (see Non-routable subscriber IP addresses section on page 3).

9. As to claim 5, Cisco Publication disclosed the maintaining comprises storing in a service object the address of a set of servers said subscriber system is permitted to access (see Internet Service Providers on page 1, third paragraph).

10. As to claim 6, Cisco Publication disclosed receiving another request specifying deletion of said new address; and removing said new address from said new set of access addresses such that said service information contains only said first set of

Art Unit: 2153

access addresses (see a menu of services that are enable to log on to and disconnect from different services, page 1, third paragraph).

11. As to claim 7, Cisco Publication disclosed further maintaining a contact information specifying a set of contacts permitted to change addresses associated with each service (e.g., "enable service to provide bill, page 1 (second paragraph)); and examining said contact information to determine whether said request to change is received from a system permitted to change said first set of access addresses (see Service Types, Transmission Control Protocol Redirect, Domain Name System Fault Tolerance, Concurrent or Sequential Service Access Mode and Host Key on page 2).

12. Claims 8-28 are similar in scope as of claims 1-7, and therefore claims 8-28 are rejected for the same reasons set forth above for claims 1-7.

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references are cited in the Form PTO-892 for the applicant's review.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krisna Lim whose telephone number is 571-272-3956. The examiner can normally be reached on Monday to Wednesday and Friday from 7:30 AM to 4:00 PM.
